COPYRIGHT CONCERN

Name of faculty member_____________________________ Date________________

It appears that your request to copy the attached material may raise some concerns about compliance with federal copyright law for the following reason(s):

- A high percentage of the work is being copied—over 10%.
- This is a consumable publication such as a workbook or coloring book.
- Making these copies will harm the potential market for the original work.
- There is sufficient time to request permission to copy the work.
- It appears that copies of the same work are being made more than once.
- The request is being made by a department or other office rather than an individual instructor.
- It appears that more than nine instances of multiple copying is taking place during one class term.
- This appears to have a non-educational or commercial purpose.

If you want this item copied please provide one of the following:
- Permission from the copyright holder
- Evidence that the work is not covered by copyright
- Evidence that copying the work meets the tests for “fair use”
  - Brevity—less than 10% of the work is being copied
  - Spontaneity—instructor does not have time to request permission from copyright holder.
  - Cumulative effect—is being used only once.
  - Has an educational purpose (teaching, criticism, research, scholarship).
  - No more than nine instance of multiple copying for each course during one class term.

You are strongly urged to contact the Custom Publishing Coordinator for the Pulse Copy Center who can arrange to obtain copyright clearance and print this document at no cost to your department (714) 278-4971.
