3. Research Advanced by Interdisciplinary Science and Engineering (RAISE)

Project Summary

The project summary is a concise description of the project's objectives, methodology, and expected outcomes. It should be limited to one page and should be written in a way that is accessible to a non-specialist audience.

Research Areas

The project description should provide a detailed explanation of the research areas and the specific problems that the project aims to address. This section should include a brief literature review and a discussion of the significance of the research.

Innovation

The innovation section should highlight the unique aspects of the project, including the use of new methodologies, technologies, or approaches. This section should also address the potential impact of the research on the scientific community and society at large.

Methods

The methods section should describe the research design and the specific techniques and tools that will be used to conduct the research. This section should include a detailed description of the data collection and analysis procedures.

Intellectual Property

The intellectual property section should describe the measures that will be taken to protect the research outcomes. This section should address the ownership of the intellectual property and any plans for commercialization.

Impact

The impact section should describe the potential benefits of the research, including its potential to advance scientific knowledge, improve public health, or address social or economic challenges.

References

The references section should provide a list of all the sources that were cited in the project description. This section should be formatted according to the requirements of the funding agency.
